Tech Tips for Seniors

Chrome Browser Update

Google has announced that its Chrome 80 browser has three major problems that make its browser insecure from hackers. Google has updated Chrome with patches for all three problems.

If you haven't received or acted on update warnings from Google, you can update the browser manually by going to the three-dot menu in the top right corner of Chrome > Help > About Google Chrome.

It is always best to heed update warnings from computer software companies.

If you have questions about any of this, feel free to make a "Technology Tips" appointment on Tuesday mornings at Generations, when the center opens. Just call the main number: 215-723-5841.
